1980 Mathematics Subject Classification
(As used in Mathematical Reviews beginning in 1980)

00 General	45 Integral equations
01 History and biography	46 Functional analysis
03 Mathematical logic and foundations	47 Operator theory
04 Set theory	49 Calculus of variations and optimal control; optimization
05 Combinatorics	
06 Order, lattices, ordered algebraic structures	51 Geometry
08 General mathematical systems	52 Convex sets and related geometric topics
10 Number theory	53 Differential geometry
12 Algebraic number theory, field theory and polynomials	54 General topology
13 Commutative rings and algebras	55 Algebraic topology
14 Algebraic geometry	57 Manifolds and cell complexes
15 Linear and multilinear algebra; matrix theory	58 Global analysis, analysis on manifolds
16 Associative rings and algebras	60 Probability theory and stochastic processes
17 Nonassociative rings and algebras	62 Statistics
18 Category theory, homological algebra	65 Numerical analysis
	68 Computer science
20 Group theory and generalizations	70 Mechanics of particles and systems
22 Topological groups, Lie groups	73 Mechanics of solids
26 Real functions	76 Fluid mechanics
28 Measure and integration	78 Optics, electromagnetic theory
30 Functions of a complex variable	80 Classical thermodynamics, heat transfer
31 Potential theory	81 Quantum mechanics
32 Several complex variables and analytic spaces	82 Statistical physics, structure of matter
33 Special functions	83 Relativity
34 Ordinary differential equations	85 Astronomy and astrophysics
35 Partial differential equations	86 Geophysics
39 Finite differences and functional equations	90 Economics, operations research, programming, games
40 Sequences, series, summability	92 Biology and behavioral sciences
41 Approximations and expansions	93 Systems theory; control
42 Fourier analysis	94 Information and communication, circuits
43 Abstract harmonic analysis	
44 Integral transforms, operational calculus

MATHEMATICAL REVIEWS

Published by

AMERICAN MATHEMATICAL SOCIETY

Editorial Committee: P. T. Bateman, M. Lowengrub,
C. M. Percy
Editors: A. A. Armendáriz, W. Bouwsma, E. Gerlach,
W. S. Hall, P. D. F. Ion, S. Ivanov, J. S. Joel,
J. E. Kister, M. Rabinathan, P. B. Smith,
S. Zdravkovska
Editorial Consultants: F. J. Beutler, J. W. Brown,
D. J. Deckard, A. Greenspoon, F. Harary, A. E. Heins,
D. J. Lewis, R. D. Low, R. J. Muirhead, M. S. Ramanujan,
J. F. Riordan, R. A. Scott, C.-T. Shih, N. Starr

Executive Editor: J. L. Selfridge
Managing Editor: W. B. Woolf
Office Manager: Frances E. Bryant
Manager, Editorial Assistants: D. J. Kimball
Head Librarian: Janice Seidler
Editorial Associate: Bogdan D. Dudzik
System Analyst: Rilla J. Thedford
Production Managers: Sandra K. Barth, Wendi L. Pohs
Reviewer Services: Lila M. Dann
Author Records: Peggy A. Gerber

General Information

Journal references in Mathematical Reviews are given in the following form: *Rückschritte der Math.* (6) 5(56) (1960/61), no. 2, 18–53 (1962), where, after the abbreviated title, one has: (series number) volume number (volume number in first series, if given) (nominal date), issue number if necessary, first page–last page (imprint date). If only one date is given, this will usually be interpreted as the nominal date and will follow the volume number. If no volume number is given, the year will be used in its place. The symbol * precedes the title of a book or other non-periodical that is being reviewed as a whole. If an issue of a journal needs to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose then the latter will appear in braces { }.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume and page number, e.g., MR 15, 122;

from Volume 20 to Volume 58 (1979), by volume and review number, e.g., MR 20 #4185 or MR 23 #A513; from 1980 on, by issue and review number, e.g., MR 80a:46017. References to reviews in *Jahrbuch über die Fortschritte der Mathematik* and *Zentralblatt für Mathematik* are by volume and page number for the period before 1972 (e.g., *Jbuch* 50, 173; *Zbl* 29, 323) and by volume and review number since 1972 (e.g., *Zbl* 218:46017). Reviews reprinted from *Applied Mechanics Reviews*, *Computing Reviews*, *Electrical & Electronics Abstracts*, *Mathematics of Computation*, *Operations Research*, *Physics Abstracts*, *Referativnyi Zhurnal Matematika* (Mehanika, etc.), *Statistical Theory and Method Abstracts*, or *Zentralblatt für Mathematik* are identified in parentheses following the reviewer's name by AMR, CR, EEA, MC, OR, PA, RZMat (RZMeh, etc.), STMA, Zbl, respectively.

Editorial Office: University of Michigan, Ann Arbor, Michigan. Editorial correspondence should be addressed to MATHEMATICAL REVIEWS, 611 Church St., P. O. Box 8604, Ann Arbor, Michigan 48107, USA.

Subscription information: Subscription prices for the year 1982 of Mathematical Reviews and the annual index are \$1680 list, \$1260 institutional member, \$155 individual member (\$180 outside the United States), \$105 reviewer (\$130 outside the United States). Combination paper and microform (microfiche or microfilm) subscription prices are \$2235 list, \$1676 institutional member. Microfiche of each issue will be mailed the fastest way possible as each issue is published.

Back number information: Back number prices per volume: Volumes 1–40, \$380 list, \$285 member; Volumes 41–50, \$552 list, \$414 member; Volumes 51–52, \$736 list, \$552 member; Volumes 53–54, \$816 list, \$612 member; Volumes 55–58, \$860 list, \$645 member. Back number

prices for 1980 are \$1680 list, \$1260 member; for 1981, \$1920 list, \$1440 member. Beginning with Volume 55, back volumes are also available on microfiche or microfilm; prior to Volume 55, back volumes are available on 16mm positive or negative microfilm. Only current subscribers are eligible to purchase back volumes on microfilm. Write to the American Mathematical Society for a detailed price list.

Mathematical Reviews is published monthly. The issue year 1982 includes a midyear author index for issues 82a–82f, and an annual author and subject index. Cumulative author indexes exist for 1940–59, 1960–64, and 1965–72. A cumulative author and subject index exists for 1973–79.

Subscriptions and orders should be addressed to the American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

18Axx General theory of categories and functors

18A05 Definitions, generalizations

- Arnoudov, Ja. N.** See **Topenzarov, Vladimir V.**, **82c:18002**
Diers, Yves Sur les familles monomorphiques régulières de morphismes. **82e:18001**
Topenzarov, Vladimir V. (with Arnoudov, Ja. N.) Quelques liens entre les $\langle n \rangle$ -catégories et les (n) -catégories. **82c:18002**

18A10 Graphs, diagram schemes, precategories, neocategories [See also 20Lxx.]

18A15 Foundations, relations to logic and deductive systems [See also 03-XX.]

- Meloni, Gian Carlo** (with Radaelli, Giorgio) A natural deduction system for residuated categories. (Italian. English summary) **82b:18001**

Radaelli, Giorgio See Meloni, Gian Carlo, 82h:18001

secondary classifications:

Reyes, Gonzalo E. Logic and category theory. (See 82f:03002)

Rosebrugh, Robert On defining objects by recursion in a topos. (82e:18006)

18A20 Epimorphisms, monomorphisms, special classes of morphisms, null morphisms, factorization (bicategories)

Kelly, G. M. (with Koubek, Václav) The large limits that all good categories admit. 82j:18002

Koubek, Václav See Kelly, G. M., 82j:18002

Pumplin, Dieter Initial morphisms and monomorphisms. 82d:18001

secondary classifications:

Diers, Yves Sur les familles monomorphiques régulières de morphismes. (82i:18001)

Osowski, Bogdan J. Subobjects, normal subobjects and duality in categories. (Russian summary) (82e:18002)

Wolff, Harvey The orthogonal subcategory problem for pointed endofunctors. (82d:18003)

18A22 Special properties of functors (faithful, full, etc.)

secondary classifications:

Adams, M. E. (with Sichler, J.) Subfunctors of full embeddings of algebraic categories. (82k:08009)

Akmalov, N. A. Topological groups of class $S(\nabla, bE)$ and their homomorphisms. (Russian) (82e:22009)

Sichler, J. See Adams, M. E., (82k:08009)

18A23 Natural morphisms, dinatural morphisms

Baclawski, Kenneth The Möbius algebra as a Grothendieck ring. 82k:18002

18A25 Functor categories, comma categories

Michelotti, Margherita See Pellegrino, Consolato, 82m:18001

Pellegrino, Consolato Construction of the subobject classifier for a class of comma categories. (Italian. English summary) 82j:18003
(with Michelotti, Margherita) A theorem on the creation of limits for a generalization of the comma categories. (Italian. English summary) 82m:18001

secondary classifications:

Andréka, Hajnal (with Németi, István) Löf lemma holds in every category. (82i:03049)

Németi, István See Andréka, Hajnal, (82i:03049)

18A30 Limits and colimits (products, sums, directed limits, pushouts, fiber products, equalizers, kernels, ends and coends, etc.)

secondary classifications:

Michelotti, Margherita See Pellegrino, Consolato, (82m:18001)

Pellegrino, Consolato (with Michelotti, Margherita) A theorem on the creation of limits for a generalization of the comma categories. (Italian. English summary) (82m:18001)

Rossi, Fabio Quasi-ends and a relative Yoneda lemma in the theory of relative bicategories. (Italian. English summary) (82f:18008)

Salles, Danielle Dualisation de la platitude. Systèmes projectifs de modules plats. Systèmes projectifs de modules injectifs. (82b:16025)

Vasilache, Sergiu Inductive (direct) limits in the categories of heterogeneous algebras and of abstract automata. (82c:08010a)

Direct limits in the categories of nonfinitary heterogeneous algebras. (82c:08010b)

18A32 Factorization of morphisms (via images, coimages, dominions, codominions), substructures, quotient structures, congruences, amalgams

Düman, D. The factorization of morphisms in a general category and in R -mod. III. Properties defined in terms of triangles and squares. (See 82i:16002)

Hauptfleisch, G. J. The factorization of morphisms in a general category and in R -mod. I. Projective and flat objects. (See 82i:16002)

Korostenski, M. The factorization of morphisms in a general category and in R -mod. II. Factorization triangles. (See 82i:16002)

Osowski, Bogdan J. Subobjects, normal subobjects and duality in categories. (Russian summary) 82e:18002

Pretorius, L. M. The factorization of morphisms in a general category and in R -mod. IV. The property \mathcal{P} and projective morphisms. (See 82i:16002)

secondary classifications:

Calenko, M. Š. See Talybov, M. A., (82d:18007)

Talybov, M. A. (with Calenko, M. Š.) Classification of ordered categories with involution, generated by functional morphisms. (Russian) (82d:18007)

18A35 Categories admitting limits (complete categories), functors commuting with limits, continuous functors, completions

secondary classifications:

Diers, Yves Quelques constructions de catégories localement multiprésentables. (82f:18006)

Frič, Roman (with Kent, Darrell C.) A completion functor for Cauchy groups. (82c:54001)

Kelly, G. M. (with Koubek, Václav) The large limits that all good categories admit. (82j:18002)

Kent, Darrell C. See Frič, Roman, (82c:54001)

Koubek, Václav See Kelly, G. M., (82j:18002)

Kumbhojkar, H. V. On the structure of initial objects of fibre categories. (82i:18009)

18A40 Adjoint functors (representable functors, universal constructions, reflective subcategories, reflections, etc.), constructions of adjoints (Kan extensions, etc.)

Diers, Yves Some spectra relative to functors. 82j:18004

Gramellini, Maria Letizia (with Tozzi, Anna) Final topological groups and coreflections. (Italian summary) 82i:18002

Hoffmann, Rudolf-E. Sequences of adjoints for Ens -valued functors. 82d:18002

Martinez-Calvo, Maria Cristina Exponentially well-behaved categories: a theorem on adjoint functors. (Spanish. English summary) 82j:18005

Pedicchio, M. Cristina Relations between K -morphisms and lax algebras. (Italian. English summary) 82h:18002

Siegel, Jerrold Čech extensions and localization of homotopy functors. 82b:18002

Tholen, Walter MacNeille completion of concrete categories with local properties. 82b:18003

Tozzi, Anna See Gramellini, Maria Letizia, 82i:18002

Wolff, Harvey The orthogonal subcategory problem for pointed endofunctors. 82d:18003

secondary classifications:

Banaschewski, B. (with Mulvey, Christopher J.) Stone-Čech compactification of locales. I. (82b:06010)

Bargenda, Hubertus (with Richter, Günther) Varietal hulls of functors. (82h:18004)

Bingener, Jürgen Darstellbarkeitskriterien für analytische Funktoren. (82i:32047)

Kelly, G. M. A unified treatment of transfinite constructions for free algebras, free monoids, colimits, associated sheaves, and so on. (82h:18003)

Mulvey, Christopher J. See Banaschewski, B., (82b:06010)

Richter, Günther See Bargenda, Hubertus, (82h:18004)

18A99 None of the above, but in this section

Guitart, René Relations et carrés exacts. 82i:18003

Herrlich, Horst (with Strecker, George E.) Semi-universal maps and universal initial completions. 82b:18004

Initial and final completions. 82c:18003

Roiter, A. V. BOCs with involution. (Russian) 82e:18003

Strecker, George E. See Herrlich, Horst, 82b:18004

Thomason, Robert W. Cat as a closed model category. 82h:18005

Van den Bril, Luc Carrés exacts de Hilton dans des contextes non abéliens. 82i:18004

secondary classifications:

Bognár, M. i -categories and homology. (82d:57005)

Calder, Allan (with Hastings, Harold M.) Realizing strong shape equivalences. (82g:55010)

Hastings, Harold M. See Calder, Allan, (82g:55010)

Nanda, Sribatsa A note on the universe of a category of fractions. (82g:55011)

Pumplin, Dieter Initial morphisms and monomorphisms. (82d:18001)

18Bxx Special categories

18B05 Category of sets, characterizations [See also 03-XX.]

Földes, Stéphane (with Mendelsohn, E.) Concrete categories and monoids of relational structures. 82j:18006

Mendelsohn, E. See Földes, Stéphane, 82j:18006

secondary classifications:

Barja Pérez, J. M. (with López López, Miguel A.) The triple $\text{Hom}(M, -)$. (Spanish) (82b:18010)

Hoffmann, Rudolf-E. Sequences of adjoints for Ens -valued functors. (82d:18002)

López López, Miguel A. See Barja Pérez, J. M., (82b:18010)

18B10 Category of relations, additive relations

Calenko, M. Š. Classification of categories of relations and types of regularity of categories. (Russian) 82i:18005

Content, Mireille (with Lemay, François; Leroux, Pierre) Catégories de Möbius et fonctorialités: un cadre général pour l'inversion de Möbius. (English summary) 82f:18002

Lemay, François See Content, Mireille; et al., 82f:18002

Leroux, Pierre See Content, Mireille; et al., 82f:18002

secondary classifications:

Succi Cruciani, Rosanna Sheaves over a regular category. (Italian. French summary) (82h:18007)

18B15 Imbedding theorems, universal categories [See also 18E20.]

Kolár, János The category of unary algebras containing a given subalgebra. II. **82c:18004**

secondary classifications:

Herrlich, Horst (with Strecker, George E.) Semi-universal maps and universal initial completions. **(82c:18004)**

Initial and final completions. **(82c:18003)**

Rosický, Jiří Equational categories. **(82c:18011)**

Strecker, George E. See Herrlich, Horst, **(82b:18004)**

18B20 Categories of machines, automata, operative categories [See also 03D05, 68Dxx, 68F10.]

Adámek, Jiří (with Koubek, Václav) Least fixed point of a functor. **82d:18004**

(with Ehrig, Hartmut; Šedivá-Trnková, Věra) On an equivalence of system-theoretical and categorical concepts. **82a:18001**

Ehrig, Hartmut See Adámek, Jiří; et al., **82a:18001**

Koubek, Václav See Adámek, Jiří, **82d:18004**

Radu, Alexandru Gh. (with Radu, Gheorghe Gh.) Existential and universal quantifiers in an elementary topos. **82c:18003**

Radu, Gheorghe Gh. See Radu, Alexandru Gh., **82c:18003**

Šedivá-Trnková, Věra See Adámek, Jiří; et al., **82a:18001**

secondary classifications:

Arbib, Michael A. (with Manes, Ernest G.) Machines in a category. **(82i:68037)**

Imori, Sueno On structure diagrams of languages. **(82a:68159)**

Lehmann, Daniel J. (with Smyth, Michael B.) Algebraic specification of data types: a synthetic approach. **(82j:68013)**

Manes, Ernest G. See Arbib, Michael A., **(82i:68037)**

Meseguer, José A Birkhoff-like theorem for algebraic classes of interpretations of program schemes. **(82m:68026)**

Penon, Jacques Infinitésimaux et intuitionisme. **(82m:51021)**

Šedivá-Trnková, Věra General theory of relational automata. **(82c:68058)**

Smyth, Michael B. See Lehmann, Daniel J., **(82j:68013)**

18B25 Topoi [See also 03G25.]

Acuña Ortega, Osvaldo Some results in the theory of lattices in an arbitrary topos. (Spanish) **82c:18004**

A note on the finiteness of an elementary Boolean topos. (Spanish) **82c:18005**

Bourn, Dominique Une autre propriété universelle pour le champ associé. **82c:18005**

Duskin, J. Higher-dimensional torsors and the cohomology of topos: the abelian theory. **82c:18006**

Genău, Mircea La catégorie des objets groupes abéliens dans un topos élémentaire est une catégorie abélienne. (Romanian summary) **82c:18007**

Howe, Douglas Module categories over topos. **82m:18002**

Johnstone, P. T. The Gleason cover of a topos. I. **82a:18002**

Factorization theorems for geometric morphisms. I. **82j:18007**

Leroy, Olivier ★Groupe de fondamental et théorème de van Kampen en théorie des topos. (French) [Fundamental groupoid and van Kampen theorem in topos theory] **82i:18006**
